Fundamentals of vPSI: Applying vPSI Methods of Problem Solving & Incident Prevention

Objectives

On completion of this one-day workshop, participants will have received instruction in:

- Understanding why problems repeat, and identify some common weaknesses in safety and risk management programs
- Understanding the true business value of near-miss events
- Using simple processes to investigate problems (such as accidents) faster with better results
- Producing effective, long lasting corrective actions
- Measuring the quality of corrective actions and investigations
- Solving all types of work problems more effectively
- Improving the pre-task planning process

Who Should Attend

Personnel at all levels of the organization would benefit from this training. Attendees can include line management, supervisors, and HSEQ personnel. In addition, anyone who reports or investigates unplanned events (such as Accidents, Near Misses, and Incidents), those who develop or implement corrective actions, and personnel involved in pre-task planning (risk assessment, JSA, JHA etc) would find value in this course.

Prerequisite

None

Customization

This course can be customized with clients' own material for in-house training.

Cost

Maximum 12 trainees per class. Call or email for pricing.
