***Planning Jobs for
Safety and Success***

Effective JSAs cause a change in what people do.

What is a “good” Pre-Task Plan?

Whether you use JSA, JHA, Tool Box Talk, Risk Assessment, Safety Huddle, or some other Pre-Task Planning (PTP) process, the ultimate objective is the same: execute work with no nasty surprises.

vPSI System™ users have learned how to make these processes more effective by incorporating a checklist of assignments that become preventive corrective actions when implemented.

What is the vPSI PTP Library ?

vPSI Group offers a cloud-based Pre-Task Planning Tool and Library SystemSM which allows users to:

- Access the system from anywhere
- Create a PTP document
- Search the open document library which contains over 300 ready-to-use PTP documents
- Modify an existing PTP document to fit a particular task
- Store and share PTP documents with users in all parts of an organization

How do I sign up for a free account?

Individuals and businesses can easily reap the benefits of vPSI’s automated approach to Pre-Task Planning. Free user accounts operate with full functionality in a public Pre-Task Planning Document Library.

You can access this library by signing up at:

<http://vpsionline.com>

How do I sign up for a corporate account?

Customizable corporate accounts are available with administrative access features. Corporate document libraries operate with multiple user interfaces, managed access, and include a customized PTP template. To find out more about corporate subscriptions, send an email to: info@vpsigroup.com.

How do I get started?

Create a free account and start using the tool, or contact vPSI Group about creating a corporate account: info@vpsigroup.com.

vPSI Group provides brief tutorials, a Quick Reference guide, and client-specific training workshops. PTP workshops result in the creation of immediately accessible PTP documents.

What clients say about the vPSI System™:

“vPSI probably had the biggest impact on turning safety around ... for our operations.”

“Safety awareness has definitely increased dramatically in our business unit this year. A large part of this was due to vPSI.”

“The vPSI metric is a better gauge of safety performance, especially compared to lagging indicators.”

“Our corrective actions have definitely improved due to the vPSI program and the philosophy has been [adopted for] corrective actions ... on the job site.”
