

Incident Investigation & Analysis

3-Day Hands-On Workshop

Who Should Attend?

Personnel at all levels of the organization will benefit from this training including:

- Line Management
- Supervisors
- HSEQ personnel
- Anyone who reports or investigates unplanned events (such as Accidents, Near Misses, and Incidents)
- Anyone who develops or implements corrective actions

While many companies invest heavily in Cause & Effect Analysis tools and training, few provide their front-line employees with training in on-scene data gathering, yet organizations rely on them to provide the foundational inputs to the entire investigative effort.

The objective for Day One of this training workshop is to provide sufficient knowledge to enable field employees to collect comprehensive and high-fidelity information on which a quality investigation can be based. Day Two focuses on analyzing the data collected using streamlined analytical techniques targeted at preventing recurrence of the incident, and Day Three concentrates on training participants to evaluate corrective actions and ultimately to ensure relevant, effective and efficient corrective actions are developed and implemented.
