Advanced vPSI Methods: Planning Jobs for Safety & Success

Objectives

During the workshop, participants will have the option of using the [vPSI Online Pre-Task Planning Tool & Library SystemSM](#) to generate multiple real-life Pre-Task Planning Documents (PTP, JSA, JSEA, JHA, etc) for their immediate use, and will learn to:

- Streamline the Pre-Task Planning process, reducing time requirements while greatly improving effectiveness
- Identify hazards and dangers in both familiar and unfamiliar tasks
- Teach inexperienced workers a simple technique for recognizing situations and circumstances with accident potentials
- Assist subcontractors and temporary / transient workers in developing on-the-spot plans for non-standard tasks
- Establish guidelines for excluding tasks not requiring pre-job safety planning

Who Should Attend

HSE personnel, potential vPSI Assessors, any personnel involved in planning or direct supervision of work tasks, personnel responsible for developing safe work procedures, job safety analyses or risk assessments.

Prerequisite

Participants will benefit from having completed the “Fundamentals of vPSI: Applying vPSI Methods of Problem Solving & Accident Prevention” training course before participating in this workshop.

Customization

This course is designed to be used with clients’ own material for in-house training. This class is modular in format and can be combined with other vPSI training courses.

Cost

Maximum 12 trainees per class. Call or email for pricing.
